react query

Ahmed Murtaza Khan

Lead AI Full Stack Engineer | MERN Stack Guru | Next.js/Nest.js, Microservices & Advanced Node.js Pro
Pakistan

Summary

- Expert in React, Next.js, and Nest.js, with advanced knowledge of Node.js and microservices. Passionate about building scalable, high-performance web applications.

- Focused on applying clean code principles, effective design patterns, and writing maintainable, self-documenting code for long-term success, inspired by the timeless practices in Code Complete.

Experience

Brain Box Automations
1 year 11 months

Lead Full Stack Developer
March 2025 - Present (1 year 8 months)
Islāmābād, Pakistan

Leading full stack projects and mentoring developers — responsible for architecture decisions, code reviews, and overall team productivity.
Directly interfacing with clients to gather requirements, present solutions, and ensure successful project execution aligned with business goals.
Built scalable applications using Node.js, Express.js, NestJS, PostgreSQL, Prisma, and Sequelize, with robust CI/CD pipelines and cloud deployment.
Optimized frontend experiences using React and Next.js, implementing clean UI/UX, dynamic routing, and efficient API data handling with React Query.

Full Stack Engineer
December 2024 - April 2025 (5 months)
Islāmābād, Pakistan

- Engineered full-stack web applications from concept to deployment, leveraging MERN stack, PostgreSQL, Prisma, and Sequelize for scalable and maintainable solutions.
- Designed dynamic and user-centric frontends with React, Next.js, and efficient state management strategies using React Query and Redux.

- Developed robust APIs and server-side solutions with Nest.js and Express.js, ensuring high-performance backend architectures and secure user interactions.
- Spearheaded end-to-end project deployments, integrating CI/CD pipelines and managing cloud infrastructure for seamless production delivery.

TecBrix Cloud
Frontend Engineer
July 2024 - Present (2 years 4 months)
Dubai, United Arab Emirates

- Develop responsive user interfaces using React.js and related frameworks.
- Collaborate closely with UX/UI designers to implement design specs and enhance user experience.
- Optimize application components for maximum performance across a variety of web-capable devices and browsers.

National University of Sciences and Technology (NUST)
Programmer and AI Researcher
April 2024 - January 2025 (10 months)

As a Programmer and AI Researcher at NUST, I contributed to the "Contactless Smart Livestock Healthcare Monitoring System for Internet-less Areas" project. My responsibilities included:

- Developing and implementing AI algorithms and machine learning models to analyze livestock health data.
- Conducting research and writing technical reports on project-related activities.
- Designing system architecture, including sensors, data transmission, and cloud storage.
- Ensuring seamless integration between devices through communication protocols and data formats.
- Managing project-related communications and acquiring necessary equipment and supplies.
- Maintaining accurate records and performing miscellaneous project-related duties.

This role enhanced my skills in AI, machine learning, computer vision, and wireless sensor networks, and provided valuable experience in a multidisciplinary research enviro

CCRIPT Agency

Associate Software Engineer

November 2023 - July 2024 (9 months)

Lahore, Pakistan

Engineered comprehensive web applications and advanced AI/ML models, specializing in Natural
Language Processing (NLP).

- Designed and developed a sophisticated dashboard app frontend using Next.js and Tailwind CSS,
ensuring an intuitive user experience.
- Architected a robust backend infrastructure with MongoDB and Node/ Express.js, optimizing
performance and scalability.
- Implemented real-time notifications and chat functionality with Firebase, enhancing user engagement
and interactivity.
- Integrated seamless user authentication via Microsoft SSO and Google login, improving security and
user convenience

SkipQ

Full Stack

December 2022 - October 2023 (11 months)

Silicon Valley, California, United States

- Best coding practices, data structures to solve problems, and communication skills.
- Hands-on expertise in React, Nodejs, ExpressJs, RESTful APIs, JavaScript, Redux.
- Built a MERN full stack App with a backend and CRUD API functionality.
- GitHub Versioning, Code Reviews, MongoDB, API Gateway, Express, React and Material UI.
- Did multiple certifications and upgraded time management skills.

SpeckPro Digital

Web Developer

July 2022 - September 2022 (3 months)

Islāmābād, Pakistan

Contributed to web application development as a Node.js, HTML5, and CSS intern.

Developed RESTful APIs using Node.js and gained hands-on JavaScript experience.
Gained practical knowledge of databases while collaborating on backend and frontend tasks.

Education

National University of Sciences and Technology (NUST)

Bachelor's degree, Computer Science · (2020 - 2024)
